

THE REDRUTH SCHOOL NEWSLETTER

Issue 263 15th February 2019

PALL Industries

Ten very lucky Year 10 students got the chance to make a follow up visit to PALL after the engineers had come to speak to them at school. Students had a complete tour of the premises, looking at all sections of work which are undertaken there.

They looked at the programming that goes behind the drilling and cutting machines and were then able to see the machines running the programme.

They also saw close up the air filters that are designed to work in fighter tanks to ensure the safety of the soldiers using them. All of the filter systems for fighter and commercial planes are designed and made here, and it was a real eye opener to see how complicated and detailed the process is.

Students also met the current apprentices who are training at PALL, two of which are former Redruth students. A number of students came away keen to apply to become an apprentice after their GCSEs. We would like to say a massive thank you to PALL Redruth for the time they have taken to work with our students.

Dance Success

After being spotted by talent scouts, Year 11 student Jago Mottart has been offered an unconditional place at two of Britain's top performing arts colleges; Urdang Academy and Laine Theatre Arts, to begin a degree level course at just 16 years old! This combines with a third scholarship place he was offered last term at Addict Dance, leaving him in the enviable position of being able to choose where he would like to start his training in September 2019.

In addition to planning his life after GCSEs, Jago has been busy rehearsing with undoubtedly our number one dance company, Matthew Bourne's New Adventures, for their 2019 production of Romeo and Juliet in which he is their youngest cast member.

World Book Day

Year 7 students are invited to dress up to celebrate World Book Day.

Your character must be easily identified e.g. Alice in Wonderland, Peter Pan, Oliver Twist etc.

Rocket Cars

Year 7 students have been designing rocket cars as part of their Design Technology lessons.

Ram Gaskets are the generous sponsors of the students. The initiative, Dendrite - Race for the Line, is a national drive to improve the uptake of careers in Science, Technology, Engineering and Maths (STEM). Students are working in House groups of 4 or 5.

They are each given a block and then work within set specifications.

The car can be no smaller than the guides. The lightest recorded car so far is 40g - but they go up to around 65g.

On the 28th of February all of the rocket cars will be raced on a track!

Duke of Edinburgh Silver

On Saturday our Year 10 DofE Silver Award students were up early for their practice walk at Minions in Liskeard. Wearing full wet weather gear they hiked over the moorland. They learnt to use their navigation and map reading skills to locate certain historic features such as The Hurlers Stone Circles, tumuli and cairns. They did an amazing job and we look forward to their practice expedition in March.

WE NEED YOUR HELP!

In support of the RLG Dance event 2019, we have been lucky enough to have been offered the opportunity by Tesco to be involved

in the token scheme. Tesco customers can deposit their blue token into one of three boxes with the most chosen project being given £4000.

To us, £4000 will secure the future for this dance event for many years to come and ensure that a minimum of 300 children each year get the chance to dance and for hundreds of people to experience an inspirational evening in our town.

We are asking you to:

- Go into Tesco and drop your token into the RLG box
- Contact as many of your extended families to do the same
- Like and share this information which is on our Facebook page – RLG Dance 2019

The voting is live now and you will be able to vote until the end of February. THANK YOU!

BE A STAMP CHAMP

Please bring any used stamps to Student Reception. They will be used to raise money for CLIC SARGENT Homes from Homes. Thank you!
